ABOUT ME

As an experienced software developer, I have a strong set of skills in web and desktop development using technologies such as TypeScript, JavaScript, React, Next.js, Express.js, selenium and Electron. I am not only proficient in both front-end and back-end development but i also have expertise in SEO. In addition to my expertise in web and desktop development, I have work with automation and scraping using selenium.

I have a proven track record of delivering high-quality development projects, as evidenced by my 5-6+ ratings on Fiverr. I am always seeking to learn and improve my skills, and I am highly motivated to take on new challenges.

EDUCATION

- ***Jinnah Jame School/College 2014-2018***
  - *SSC 872/1100* ***(79.2%)***
  - *HSSC 900/1100* ***(81.81%)***

- ***Comsats University Islamabad 2019-2023***
  - ***BSCS 3.57/4*** *(Bachelor in Computer Science)*

EXPERIENCE

- ***Fiverr 2020-present***

I have completed 5-6 successful software development projects on Fiverr, including an extension API for Twitter extraction, a mass emailer, and a scraper for a website. My work on Fiverr has honed my technical and professional skills.

- ***Blind Helper 2022-2023***

By using the modern computer vision technology, blinder helper has been developed. It is applicaiton that focuses on identifying the objects, light condition and Estimated distance of object from them.

- ***Freelancing 2020-present***

My notable projects besides fiverr include chat applicaiton in React, Food delivery Application, Email Extraction Desktop application and Extension. Beside I work on minor personal projects that includes qr-code scanner, Ecomerence Store, and tik tok clone etc.
